PROFESSIONAL SUMMARY

Senior Software Engineer with 14+ years building and evolving web applications. Frontend specialist in React, TypeScript, and JavaScript, with working experience across backend services and React Native mobile. My work spans internal developer tooling and customer-facing product, from platform systems that took products into new markets to shopping features on a major retail site. Joined Spiff as an early frontend engineer and stayed through its acquisition by Salesforce.

TOOLS & STACKS

- **AI-Assisted Development:** Claude Code, Cursor AI, AI pair programming in production codebases
- **Languages:** TypeScript, JavaScript (ES6+), PHP, Python, Ruby, SQL, HTML5, CSS3, Sass/SCSS, Less
- **Frontend:** React, React Native, Redux, AngularJS, jQuery, Handlebars, Lexical, Storybook, Server-Side Rendering (SSR), Responsive UI, Internationalization (i18n/l10n), Accessibility
- **Backend & Data:** Node.js, Express, Django, PostgreSQL, MySQL, Firebase/Firestore, GraphQL, RESTful API design and integration, Stripe
- **Testing & Code Quality:** Jest, Vitest, React Testing Library, Cypress, TDD, ESLint (custom rule sets), Prettier, Stylelint, Husky pre-commit hooks, coverage enforcement
- **Build & Platform:** Webpack, Vite, Git/GitHub, CI automation, AWS S3, WordPress/WooCommerce

WORK HISTORY

Senior Member of the Technical Staff – **Salesforce** (Mar. 2024 – May 2026)

Stayed on for two years after Salesforce acquired Spiff in March 2024, scaling the product for enterprise accounts.

- Raised the codebase to Salesforce's post-acquisition unit-test coverage standard, expanding Jest test suites across the frontend. Established strict ESLint rule sets that drove company-wide TypeScript adoption.
- Adopted Claude Code and Cursor AI into daily development, pair programming with them on refactors, debugging, and test-coverage work.
- Shipped a document composer on the Lexical editor framework after evaluating several WYSIWYG options, customizing it heavily for document workflows. Added a Handlebars-style merge-field system that resolves placeholders to live profile values at render time. Extended the server-side Ruby layer to customize PDF output.

Frontend Engineer – **Spiff**, acquired by Salesforce (Aug. 2021 – Mar. 2024)

Built core platform infrastructure at the startup, through to acquisition.

- Architected the frontend internationalization infrastructure from the ground up and migrated thousands of hardcoded strings across the application. Launched the product in Japanese, Spanish, and additional locales, a top-priority value driver for Spiff and Salesforce.
- Created a dev-mode pseudo-localization toggle that renders every translated string as X's. It became the team's standard pre-merge check, letting any engineer spot untranslated UI in seconds.
- Wrote custom automated tooling scripts (dead-code detection, unused-export pruning, lint enforcement) that systematically drove down technical debt across the repository.
- Designed a recursive component tree that renders company org hierarchies at any depth, powering team-based commission structures for enterprise accounts.
- Developed features against GraphQL APIs and practiced TDD, writing Jest and React Testing Library specs before implementation.

Senior Software Engineer – **XANT**, formerly InsideSales.com (Dec. 2020 – Aug. 2021)

- Authored the frontend architectural standards adopted across the engineering organization, defining code conventions, lint rules, and component structure.
- Mentored mid-level and junior developers through pair programming, working alongside them on their own projects to unblock delivery and grow their skills.
- Modernized legacy core technologies and syntax paradigms, improving runtime performance and reducing maintenance burden.

Web Developer – **Chatbooks** (Mar. 2019 – Aug. 2020)

- Rebuilt the book creation flow, one of the company's core revenue paths, in React. Unlocked Premium Layflat book creation on desktop, giving customers a far better large-format editing experience.
- Executed a progressive, zero-downtime migration from legacy AngularJS to React across the customer-facing site, preserving production stability throughout.

- Built Cards taxonomy pages with category browsing and search filters using Node.js server-side rendering, accelerating page loads and improving SEO discoverability.
- Implemented Branch deep links and platform-specific quick-flow screens routing customers from Instagram's storefront into the iOS and Android apps.

Front-End Developer – Overstock.com, now Bed Bath & Beyond (Sept. 2015 – Mar. 2019)

- Owned the frontend for all User Generated Content on a high-traffic national e-commerce site: ratings, reviews, customer photos, and Q&A. Brought these templates into ADA accessibility compliance.
- Launched customer review images end to end, validating and formatting uploads client-side before pushing to AWS S3. Real customer photos let shoppers see products in use before buying.
- Led the site-wide migration of star ratings behind feature flags, coordinating simultaneous multi-department deploys. Introduced rating-only reviews, measurably increasing review volume.
- Rebuilt the responsive See All Reviews page and embedded a reusable React Add To Cart module into the mobile review flow. A two-week A/B test showed conversion lift.
- Delivered an internal SEO admin portal (React, Redux, Node.js, Express) letting business users manage SEO titles and taxonomy display names.
- Ported featured-product logic into an AMP search page using amp-bind, optimizing CSS to meet strict AMP size limits. Rearchitected a WordPress plugin into the embeddable affiliate-links widget that launched the affiliate program.

Full Stack Developer – Room Choice (Dec. 2014 – Aug. 2015)

- Developed full-stack features for student-housing management software using AngularJS/CoffeeScript on the frontend and Python/Django with PostgreSQL on the backend.
- Optimized queries, reporting, and application performance as the platform scaled to a rapidly growing number of students and institutional accounts.
- Designed and integrated the RESTful APIs between frontend and backend layers, collaborating with an international, distributed engineering team.

Custom Developer – Enspark (Nov. 2011 – Dec. 2014)

- Rebuilt the company's Learning Management System in PHP, MySQL, JavaScript, and jQuery, implementing user-account progress tracking across the eLearning catalog.
- Built custom web applications and features for small-business clients, spanning design, frontend, backend, and WordPress theme development.
- Produced interactive eLearning courses and marketing banners in Adobe Flash using ActionScript 3.

PASSION PROJECTS

Food Cards – React, TypeScript, Firebase, Anthropic Claude API | food-cards.travishoki.com

A safe-foods catalog built for my son, who has food avoidance issues. Integrated Claude via the Anthropic SDK (@anthropic-ai/sdk) so users filter the collection in plain English. "Easy breakfast ideas" resolves to category, difficulty, sort order, and keyword filters at once. Prompt engineering enforces strict JSON output, and every response is schema-validated before use. Ambiguous output degrades gracefully rather than breaking the UI. Also implemented scored fuzzy search.

Hoki Skateboards Website – PHP, WordPress, WooCommerce, JavaScript, Stripe | hokiskateboards.com

Founded a skateboard company selling skateboards, apparel, and a self-published children's book. Designed the brand and built the storefront on a custom WordPress theme, with WooCommerce and Stripe handling retail and checkout.

Hoki Skateboards App – React Native, TypeScript, React Native Game Engine, Matter.js, Firebase | hokiskateboards.com/app

Designed, illustrated, and built a mobile game in React Native, shipping one codebase to iOS and Android as real native UI. Published on the [Apple App Store](https://www.apple.com/app-store) and Google Play.

EDUCATION

Bachelor of Science, Digital Media (Emphasis in Internet Technology) – Utah Valley University

Associate in Applied Science, Digital Communication Technology – Utah Valley University

BEYOND ENGINEERING

Illustrated and self-published two children's books, one Kickstarter-funded. Improv Broadway stand-up comedy graduate. Volunteer Cub Scouts den leader.

PORTFOLIO

TravisHoki.com – React, TypeScript, Vite, Storybook, Jest/Vitest | travishoki.com
